

With the Aged Comes the Wisdom of the Ages

May God bless Mary. Mary is a 91-year old supporter of AWA. After she received the last issue of the *Advocate* she wrote what you see below to Alberta's Minister of Environment and Parks about the Castle. Mary's concern for what we should leave her two great granddaughters is inspirational.

May the Christmas season deliver to all of us, not least the officials charged with protecting our natural heritage, some of that inspiration and the common sense Mary saw in Lorne Fitch's arguments against OHVs in the Castle.

Shannon Phillips,

What will my great grandchildren inherit from me? Some material things, but most of all I want Alberta to have pride and protection for our natural heritage so they can enjoy the Castle and other parks without OHV degradation. Do not delay ^{any} full protection as I am now 91 and I see efforts of the Alberta Wilderness Assoc headed! Willing to speak up for our environment. Mary

(next side of card)

Enclosed article by Lorne Fitch, long time Lethbridge resident, who you probably know. I have known Lorne since 1980 and think he has a good dose of common sense. (Lorne Fitch 10 arguments.) — M.K.
